

LSDRC

Year started	Investigator	Institution (location)	Research Project
May '08	Bunnell	Tulane University (LA)	Mesenchymal Stem Cell Therapy for Krabbe's Disease
May '08	Haskins	University of Pennsylvania (PA)	Gene therapy for alpha-mannosidosis
May '08	Martin	Auburn University (AL)	Enzyme Replacement Therapy and Role of Unfolded Proteins in Response to Feline GM1 Ga
May '08	D'Azzo	St. Judes Children's Research Center (TN)	GM1 as apoptotic signal in neurodegenerative GM1-gangliosidosis
January '07	Ellwood	U. Of Iowa (IA)	Pathogenesis of murine MPS IIIB
January '07	Qi	Children's Medical Center (OH)	The Physiological Importance of Saposin C's Fusogenicity
January '07	Cornford	BBRI (CA)	Trojan Horse Gene Therapy of Inclusion Body Disease
January '06	Dobrenis	Albert Einstein (NY)	Gangliosidosis Therapy Using Neuronotropic Enzyme
January '06	Seyfried	Boston College (MA)	Evaluate MJ-DGJ as a substrate reduction therapy, neural stem cells as a cross-correctional therapy, and caloric
January '06	Mellon	UC Regents – SF (CA)	Neurosteroid Therapy for Lysosomal Storage Disorders
January '06	Gritti	Fondazione San Raffaele (Italy)	Neural Stem Cell-based Therapy for GM2 Gangliosidosis
January '06	Cornford	BBRI (CA)	Gene delivery across the blood-brain barrier in Lafora knockout mice project
January '06	Dawson	Scripps (CA)	Validation of novel approaches for the treatment of Batten disease
